

Beyond the fault code.

Automotive intelligence. Grounded in evidence.

A direction. A reason to trust.

ORVECT brings orientation and vector into one name.
A precise, technical identity for an automotive AI project.
Pronunciation: OR-VEKT.

01 Purpose

Help workshops structure their diagnostic reasoning.

02 Belief

Evidence gives a recommendation its value.

03 Promise

Make the path from symptom to next check clearer.

Current stage: early technical prototype. Product intent is not a verified outcome.
Name and URL research is preliminary, not trademark clearance.
DiagPilot is the former prototype name. No external endorsement is implied.

Direction, made visible.

SIGNAL / RECOMMENDED

Three parallel rays express momentum and structured orientation.
The taller central ray provides a distinct point of reference.
Use the symbol and uppercase wordmark as a fixed composition.

Clear space At least one bar width on every side of the mark.

Minimum size Digital lockup: 140 px wide. Print lockup: 30 mm wide.

Integrity Preserve proportions. No glow, bevel, distortion or rotation.

Precision has a palette.

Digital: sRGB values above. Use dark text on orange for small copy.

Print: these are RGB production proofs. A printer must handle CMYK conversion.

Ambition. With evidence.

PRIMARY LINE

Beyond the fault code.
Au-delà du code défaut.

La confiance se construit.
Elle ne se devine pas.

Original brand manifesto. Not a founder quotation.

Use clear verbs: inspect, connect, verify, explain.

Describe product capabilities as objectives until they are validated.

State prototype status wherever a sales interpretation is possible.

Do not imply licensed data, customers, measured gains or partnerships.

One identity. Many formats.
